

# Workshop

# PARTICIPATORY MEDIODGRAPHIES

*How to observe Humans and (their) animals?*

May 22/23, 2014

In this interdisciplinary workshop we want to discuss our concept of Participatory Mediography. Thereby we understand a collective ethnographic method in order to describe knowledge practices via multi-perspective and non-linear narrative strategies. In a mixture of lectures, working rounds, practical units and film screenings we discuss potentials of this interactional approach.

The workshop serves as a preparation for a Participatory Mediography, which shall take place in Bangalore/India in summer 2014. Besides the theoretical exchange amongst all participants a main aim of the workshop is to create interdisciplinary production units for the interactive documentaries.

»Tu nous regardes comme des insectes!«

*Ousmane Sembene to Jean Rouch in 1965*

## DAY 1 Thursday, May 22

Room A213
